1 Typo3 Frontend

1.1 Frontend behavior:

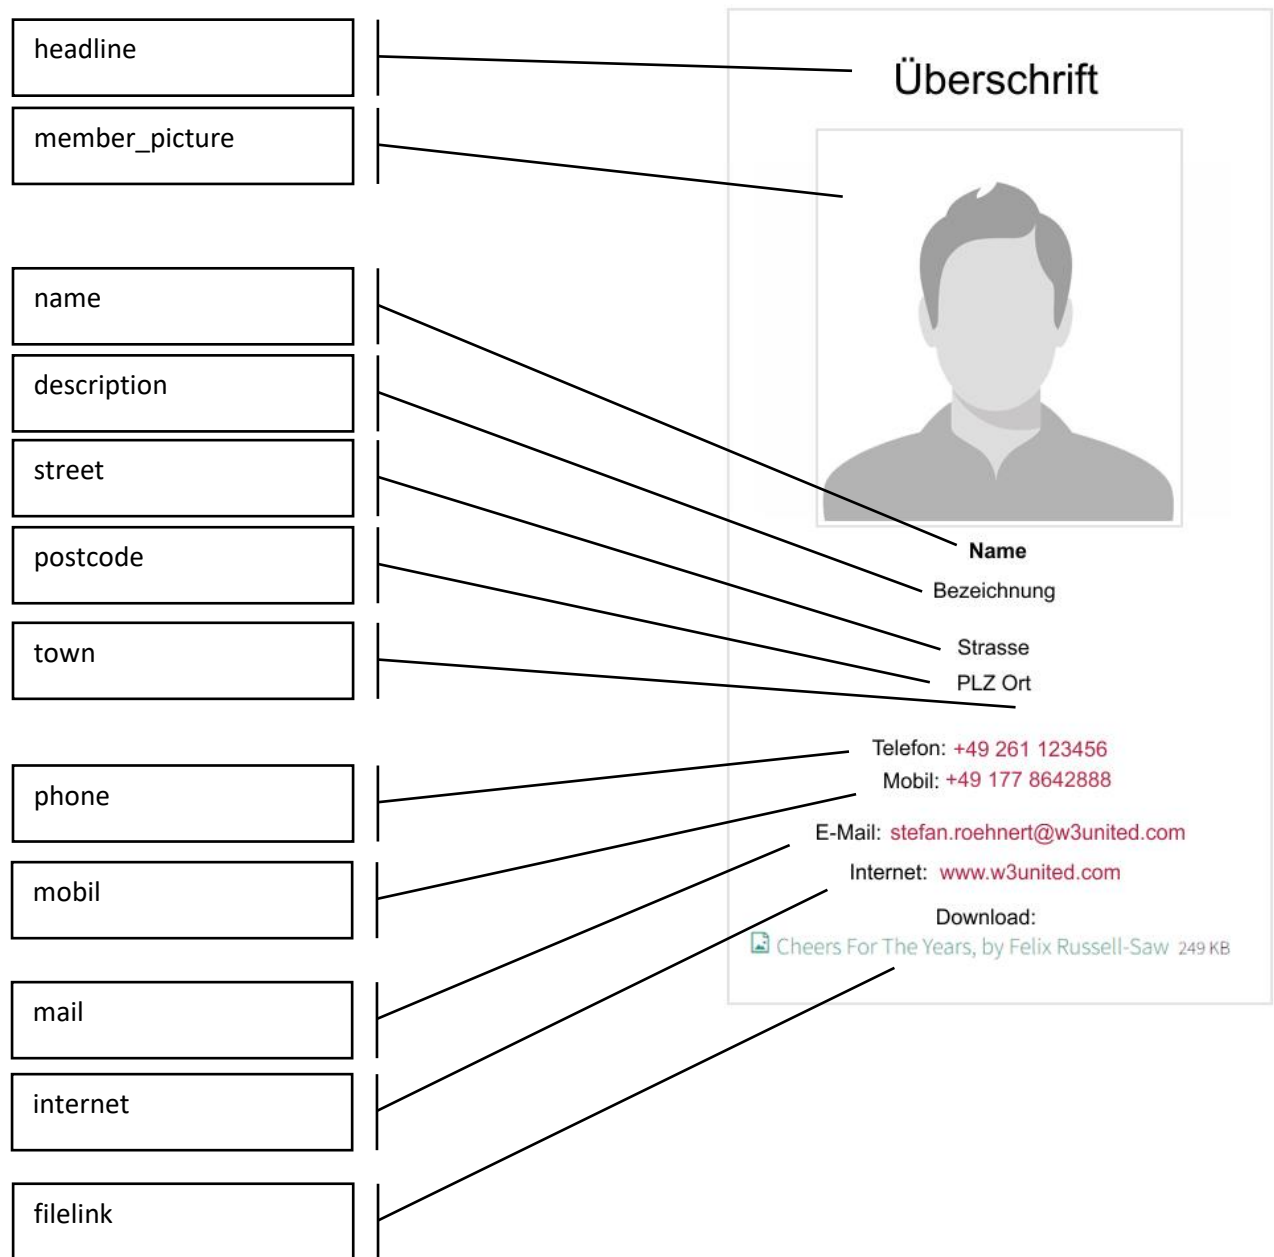

A new content element "w3_infobox" is required for Typo3 v11. The information is output in the frontend as shown. The content element should be able to be inserted multiple times as content and should automatically adapt to the column width.

Example : <https://menu.w3united.com/media-consulting/example/infobox>

1.1.1 Display front end :

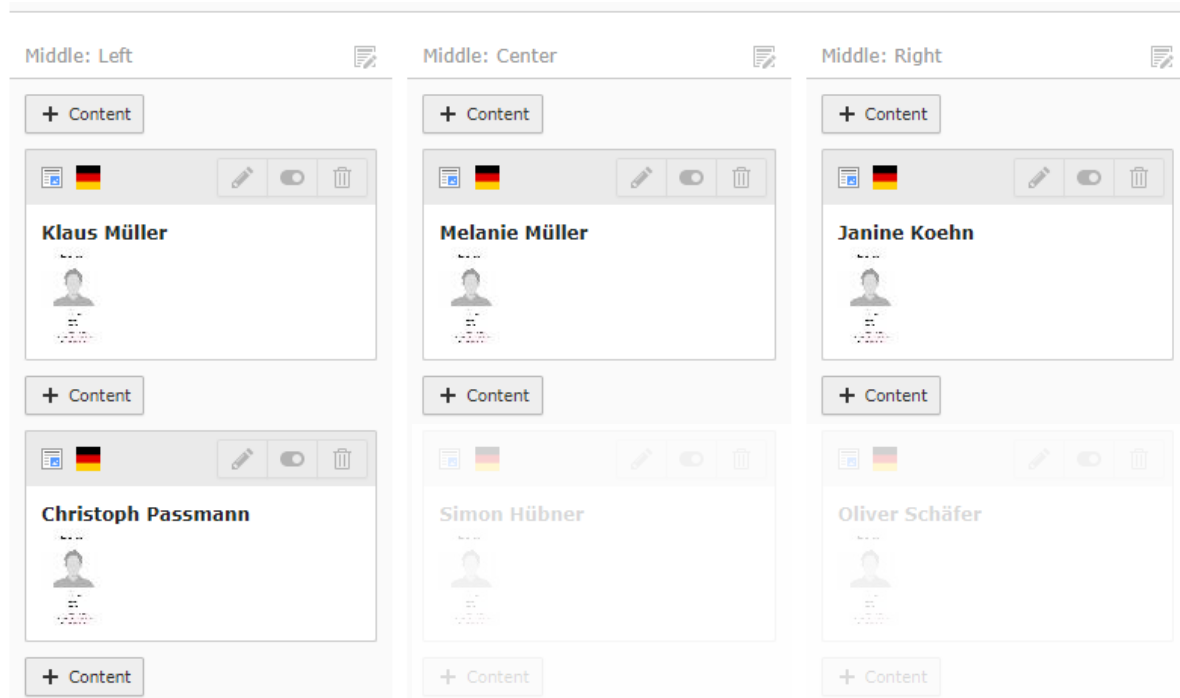

1.2 Frontend / Backend naming:

2 Typo3 Backend

2.1 Backend Looking

The title, name and image should be displayed in the backend preview, if available. The page content looks like that:

2.2 Backend behavior:

The **"w3_infobox"** plugin should be found in the content elements under "Plugins". The following content options should be included as tabs: **Description, Image, Address, Contact, File Links, Configuration**.

English designations are to be translated into German in a language file, see below.

2.2.1 Infobox tab **User**

Headline and name are entered via a simple input field. Designation via text editor.

[illegible]

2.2.2 Infobox tab Image:

Ort

2.2.4 Infobox tab **Contact:**

Telephone, mobile, e-mail and Internet are entered via a simple input field.

The screenshot displays a web interface with a tabbed menu at the top labeled 'Inhaltsoptionen'. The tabs are 'Bezeichnung', 'Bild', 'Adresse', 'Kontakt', 'Dateilink', and 'Konfiguration'. The 'Kontakt' tab is selected and highlighted with a red circle. Below the tabs, there are four sections, each with a label and a text input field: 'Telefon', 'Mobil', 'E-Mail', and 'Internet'.

2.2.6 Infobox tab **Configuration**:

2.2.6.1 Content Alignment

It should be possible to choose between the alignment of the infobox content. Center alignment or left alignment. Default center alignment.

2.2.6.2 location of the dummy image

Default Storage Folder: EXT:w3_infobox/Resources/Public/Images/dummy.jpg

2.2.6.3 CSS ID

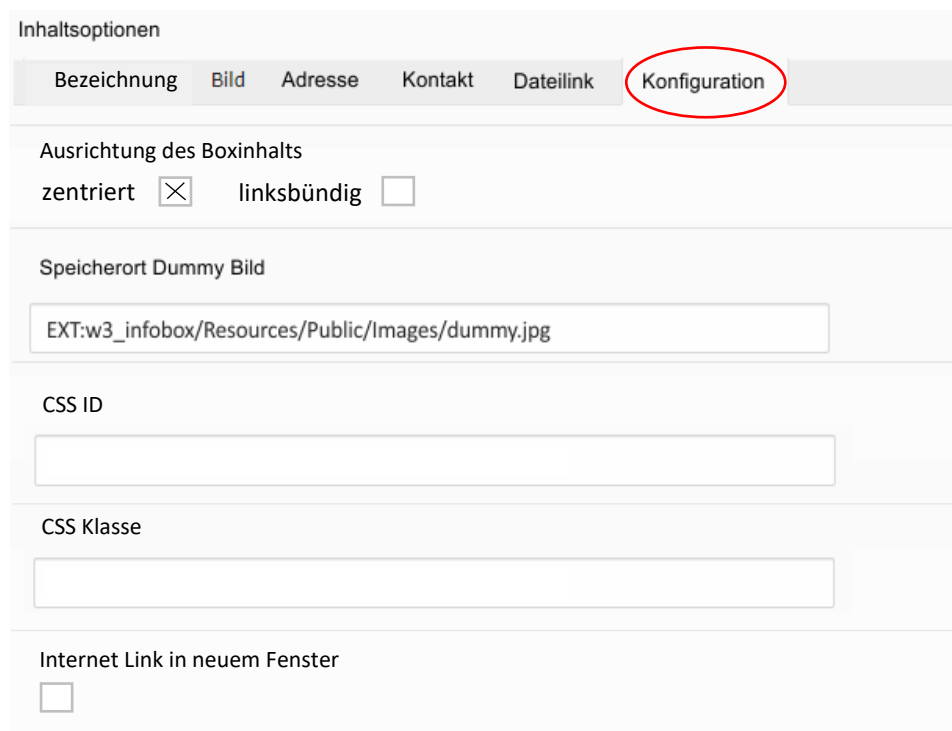

An individual CSS ID should be able to be assigned to the info box. Default none.

2.2.6.4 CSS Klasse

An individual CSS Class should be able to be assigned to the info box. Default none.

2.2.6.5 External Link

If activated, the website link should be opened in a new tab

3 Technical information

1. The frontend display must use Bootstrap and should be changeable using a custom css file.
2. Information outputs in the frontend like telephone, mobile, e-mail, internet must automatically be linked.
3. **All Input fields** in backend **without information** should be **hidden** in the frontend.
4. If no user image is uploaded in the backend on tab image, a predefined dummy image should be used automatically. The default storage path of the dummy image is specified in the configuration tab. Default Storage Folder: EXT:w3_infobox/Resources/Public/Images/dummy.jpg

The path can be changed.

The image should adapt to the size of the output.

3.1 Language file

headline => Überschrift
description => Bezeichnung
member_picture => Bild
name => Name
street => Straße
postcode => Postleitzahl
town => Ort
phone => Telefon
mobil => Mobil
mail => E-Mail
internet => Internet
user => Benutzer
image => Bild
address => Adresse
contact => Kontakt
filelinks > Datei Download

3.2 Custom css file

The plugin output should be wrapped in a container with class "w3_infobox". Each information output in the frontend should be able to be designed using a css class. Eg ib_headline, ib_picture, ib_name...
